## *The Best Viewing Solution for IBM Content Manager 8*

MS Technology, an IBM Silver Business Partner, has over 25 years of experience delivering high-performance viewing solutions for Enterprise Content Management (ECM), Software As A Service (SAAS), and in-house application. Our viewing solutions has been incorporated with IBM Content Manager 8 within IBM's eClient, pClient (client for Windows), and WEBi to provide superior image rendering and document manipulation tools.

Launched in 2011, the eViewer, was the next generation on document viewing technology from MS Technology. The eViewer, a zero-footprint, platform agnostic, delivers all the function and features Content Manager 8 users have come accustom to along with many additional added features and functions to empower users.

*"The eViewer is the most complete viewer with a lot of impressive features that CM8 users will definitely benefit from."*  
*Richard Saglimbene (IBM ECM Senior Account Manager)*

### **100% Backwards Compatible with eClient and PClient**

The eViewer is the only viewer that supports all documents and annotations supported and created by the IBM eClient and pClient. Formats include MO:DCA documents and annotations. Create new annotations on a document in the eViewer, and users will be able to view and edit them in the eClient and pClient as well.

### **Integrate with and without IBM Content Navigator**

The eViewer can be integrated with or without IBM Content Navigator enabling integration with various middleware options and greater integration flexibility not available with the IBM Content Navigator or Daeja Virtual Viewer. Integrate with non-IBM application including Pega BPM, or a custom homegrown middleware application.

## More Features

The eViewer provides a number of outstanding features that are not available with the IBM Daeja Virtual Viewer.

- ★ **Smart Redaction:** Automatically search and redact sensitive content without having to manually search the document.
- ★ **Document Compare:** Instantly compare two versions of the same document with highlights of the changes between the document saving countless hours from reviewing document changes.
- ★ **Spilt and Merge Docs:** Split a document into two or more separate documents or merge two or more documents into one.
- ★ **More Annotation options for greater usability:** Beyond the standard Content Manager 8 annotations, the eViewer offers more annotation options, including annotations compliant with BPM and workflows.
- ★ **Annotations:** The eViewer supports all CM8 annotation formats including MO:DCA and JSON annotations.
- ★ **More APIs = greater flexibility:** Control all aspects of the eViewer via JavaScript APIs and integrations through REST APIs.

## Higher Level of Support

MS Technology is dedicated to customer success and delivering outstanding results and business value by providing the highest level of support in the industry. We strive to make sure our customers experience a little downtime as possible and work to deliver resolutions in the shortest amount of time possible. Recognized by IBM as a leader in partner support five years in a row and we continue to strive for excellence.
